ABSTRACTED-PUB-NO: KR2001016262A

BASIC-ABSTRACT:

NOVELTY - A charged car pool agent site on the internet is provided to automatically process the car pool so that a car driver and a car pool user can select a desired car pool service and car, respectively.

DETAILED DESCRIPTION - The car driver and the car pool user access the server of a car pool web site(A10). It is asked to the person who accesses the car pool web site to agree with a use contract(A11). The server request the inputs

of the personal information such as IDs and passwords to the car driver and the car pool user in order to identify them(A12,A13). The car driver as a member inputs the license number of his/her car, insurance details and a desired cost, which are stored in a database(A14). The car pool user as the member searches the information such as a departure location and an arrival location of a car driver from the database(A16), and thereby obtains the detailed information on the detailed schedule for a desired arrival place(A17,A18). The detailed drive path of a car can be checked via a geographic information database(A19).
